## ACTIVITY REPORT

### 1. CONTENT

- 2. Preparation – p 2
- 3. Realization – p 2
- 4. Leads/facilitators impressions – p 3
- 5. Evaluation – p 3

### 2. PREPARATION

After a long break due to the coronavirus pandemic, representatives of partner institutions from Serbia and Montenegro met with the aim of agreeing on further implementation of project activities in accordance with health recommendations. Activities are planned under WP3, WP4, WP6, WP7 and WP8.

### 3. REALIZATION

After the opening of the meeting and the welcoming speech of the host, the action plan for the current workshop was presented. The Agenda was adopted unanimously.

At the suggestion of the project managers, it was agreed to request an extension of the project implementation deadline by twelve months, due to the impossibility of holding project activities / realization of visits to partner institutions abroad during the coronavirus pandemic.

Within WP3, Ivan Tomić from Krusevac, gave a lecture on the use of the Moodle platform for e-learning. Also, video recording and processing software and video conferencing tools were presented. Given the current epidemiological situation, it was proposed that part of the training of educators within the Centers take place through online learning, for content that can be usefully processed in this way. Representatives of the institutions reported on the ongoing spatial, personnel and regulatory preparations for the opening of the Learning Hubs, as well as on the process of delivering the purchased equipment to the Centers. It is proposed that, after the process of accreditation of the training program, for which new standards are expected to be adopted in the next few months, the target groups be introduced to the structure, goals and contents of training in cooperation with preschool educators' associations, as well as by direct communication with preschools institutions. Given the circumstances, the trainings will be

## ACTIVITY REPORT

organized by combining online learning methods with the organization of direct meetings within Learning Hubs, while respecting epidemiological measures.

In order to disseminate the project results achieved so far, a proposal was adopted that the opening of the Learning Hubs be covered by the media, with a more detailed presentation of the project goals and purchased equipment. Each institution will also perform internal dissemination of the project goals and outcomes.

Within WP4, the first activity was dedicated to discussing ToT training on the topic of quality assurance. The training should be provided by the University of Birmingham, and it will be held when the circumstances allow it, given the global deterioration of the epidemiological situation and the restrictions on abroad travel.

Activities under WP6 continued with a meeting of the Quality Commission and an evaluation of progress in achieving the project objectives. Representatives of WEBIN stressed the importance of evaluation activities and the need for more intensive involvement of institutions in the quality control process, given the reduced response of representatives of partner institutions in assessing the outcome of work meetings. It was agreed that the Quality Commission would organize additional online meetings, which would be recorded and available on Google Drive.

Project representatives from Novi Sad reported that the mid-term auditor's report on the progress of project activities was well assessed in Brussels.

### 4. LEADS/FACILITATORS IMPRESSIONS

All activities planned by the Agenda have been implemented. Representatives of all teams present were acquainted with the accomplished and planned activities within WP3, WP4, WP6, WP7 and WP8.

### 5. EVALUATION

*Will be available soon.*
